

When bringing measurements to the showroom, please remember:

- ✓ Include the length (along the back wall) and depth (front to back) of your countertops
- ✓ Always measure in feet and inches, rounding up to the next inch.
- ✓ Always measure the depth and width of all appliances (refrigerator, stove, cooktop)
- ✓ Make sure to tell your designer if your cooktop is built into your countertop or if it is a free-standing stove
- ✓ Indicate whether the countertop butts up to a wall or is open on the end
